Gaya Full Movie Download 720p Hd ((TOP)) (1998) Full Movie (1998)  
GUPT (1997)- Blu-Ray- 720p- MHD- X264- AC3 5.1- ESubs- DrC.Effects  
of acute and chronic 2-amino-5-chloropyridine administration on the  
development of experimental allergic neuritis (EAN) in Lewis rats.  
2-Amino-5-chloropyridine (2ACPD) has been reported to suppress  
experimental allergic encephalomyelitis (EAE) in Lewis rats and  
prevent the induction of EAE in SJL/J mice. To further evaluate the role  
of 2ACPD and thus its possible therapeutic use in multiple sclerosis,  
the effects of 2ACPD on the induction and clinical development of EAN  
were examined in Lewis rats. The results revealed that 2ACPD given  
at doses of 20 to 100 mg/kg p.o. significantly delayed the onset and  
reduced the incidence of clinical EAN when administered for 7-10  
days following immunization. In addition, 2ACPD given 3 times a week  
at 10 mg/kg for 14 days following immunization also delayed the  
development of clinical EAN. This protective effect of 2ACPD was  
shown to be dose dependent, with a reduction in EAN observed at 20  
mg/kg while maximal protection was seen with doses of 40 mg/kg or  
greater. Also, 2ACPD given at a dose of 10 mg/kg with or without a 7  
day interval between treatments was effective in delaying the onset  
and reducing the incidence of the disease. Daily oral administration of  
2ACPD at the dose of 40 mg/kg for 10 days after immunization was  
not effective in significantly inhibiting the development of EAN. These  
results demonstrate that 2ACPD can effectively inhibit
