About This Game

Just Alone - adventure game, in which you become a crewmember of a spaceship, that crashed during its flight. Bill Yesterday is the only survivor of the crash. His mission is to survive on a planet, destroyed by its previous inhabitants, equiped only with a radio and pile of debris left from his spaceship. His team was sent to gather samples and do research on the life of people who inhabited the planet. Now, Bill cannot do a lot of research, because most of his equipment broke into thousand pieces.

To survive in this hostile place, Bill has to hunt, gather resources and try not to get in the way of mutants, who turn out to be far from friendly to our protagonist.

Apart from doing numerous missions, Bill can construct a variety of bulidings, hunt and explore the surroundings.

The game is still developing. New updates&fixes come soon.

10V10 Still love this game !. <https://youtu.be/b9vjZW368LY>

[BUYER BEWARE: Since recoeding the above game footage I have tried on several occasions to play the game through to the end; and each time a game breaking bug has stopped me forcing a restart. I'm not even sure if the game is completable because of these issues. Maybe if you get lucky or play it in one sitting.](#)

[Even without the game breaking bugs, this game would be very hard to recommend at as the overall poor performance, badly implemented \(and pointless\) survival and crafting mechanics, and general bugs and glitches makes it hard going to enjoy this game.](#)

[Add in the ugly graphics and poor combat and there is no way this game is worth the full asking price.. Just Alone](#)

[\(if this game goes free to play then it will be much better :\)\). lags like crap. I tried playing the game but everytime I try playing it, it keeps crashing on me. The game could be better . but right it sucks and will keep sucking until this problem is fixed.](#)

Definitely not ready to be released, needs allot more work and polishing. If your planning to buy it dont do it now, wait and see.

Pros:

Shouting sheep

ALT F4 Button works to escape the repolsive UI and model textures

Cons:

Everything that is not in the Pros section.

1.5V10. the game lags alot, please fix it. would be great if didn't lag.. why are there zombies. copy cat of many games.. this game is crap. Another \u2665\u2665\u2665\u2665\u2665 survival game. Woke up in a crashed spaceship, found a shotgun, seen a overpopulated amount of ducks and goats, killed as many as I could before I ran out of ammo just to find out they instantly started respawning. 420V666 would 360 noscope more ducks and goats.. Even for an alpha game, I expect to at least be able to see my surroundings in broad daylight. There's like a 50 foot circle of DARKNESS around me. It's insane. I run towards the sunny area, just to see it slowy covered up by the circle of darkness. So it's centered on ME, and no matter WHERE i go, I can't see a damn thing.

Don't waste your time. Try the Long Dark. At least you can see in that game.
